03/04 On The Wall - Olympia
06/03 Out of Fashion - Brick Lane
04/02 Exchange - Bath/Sofifia

About Me

I have recently completed a degree in Graphic Design specializing in installation, event and exhibition design. During and since my degree I have had opportunities to work professionally in this field, with clients ranging from motor manufacturers to my own college.

Prior to college my background is largely in event businesses, from dance festivals to golf tournaments. This has provided me with a practical hands on approach to work and has proved to be a major influence and an important skills resource for my design practice. The understanding gained of the way people interact with spaces and environments has proved invaluable in producing effective and elegant projects.
